(73) Assignee: James John Wiseman, Michael M. (US)

(41) Notice: Substantive examination of this patent is extended to a date under 35 U.S.C. 150(b) by 6 days.

(21) Appl. No.: 16/846,092

(22) Filed: May 6, 2019

(43) Publication Date: Nov. 5, 2019

(51) Int. Cl. (2006.01) E04B 11/24

(52) U.S. Cl. (2006.01) E04B 11/24

(54) Title of Invention: CUSTOMIZABLE TENTING SYSTEM

(57) Abstract: The present invention is directed to a tent structure that is designed to be used in a variety of environments and circumstances, and is particularly well suited for use in emergency situations. The tent structure is designed to be used in a variety of environments and circumstances, and is particularly well suited for use in emergency situations. The tent structure is designed to be used in a variety of environments and circumstances, and is particularly well suited for use in emergency situations.

Patent No.: US 10,837,195 B2
Date of Patent: Nov. 17, 2020

ABSTRACT
 The present invention is directed to a tent structure that is configured for various uses, designs, configurations and accessories, along with rigging and accessories. It includes a method for erecting the tent structure and a method for dismantling the tent structure. The tent structure includes a main body, a plurality of support poles, and a plurality of guy lines. The tent structure is designed to be erected and dismantled in a short amount of time. The tent structure is designed to be erected and dismantled in a short amount of time. The tent structure is designed to be erected and dismantled in a short amount of time.

ABSTRACT
The present invention is directed to a tent shelter that is configured to receive one, multiple configurations and dimensions, such as with rigging and accessories. It includes a frame structure to receive tent fabric and accessories along the perimeter edges. An anchor system (including a line or rope) is used to couple the tent shelter to another tent shelter, tent fabric accessories or a fixed object using a line and/or existing accessories to support the tent. The structure can include accessories, rigging and support the tent. An existing accessory coupled to the tent rigging system can be coupled to a tent shelter when laid flat. A digital display system can be used to support the tent and accessories within the tent and to provide information and data including a digital tent shelter and accessories.

(60) Provisional application No. 62/666,847, filed on May 4, 2018.	The present invention is directed to a tent shelter that is adapted for various use, through configurations and modifications, across with different accessories. It includes a mechanism for a tent with having two main sections in peripheral edges. An interior system (including fabric) can be equipped at the interior portion. The shelter includes apparatus used to couple the tent shelter to another tent shelter, and shelter accessories in a detachable manner. The tent shelter includes a detachable interior system, including and various accessories to support the use. The tent shelter includes various accessories, which can support the use. An interior assembly integral to the tent shelter system can be equipped as a tent shelter system. A detachable shelter system can be adjusted and supported on the tent can be incorporated into the shelter system by using a zipper that holds any items inside.
